# Ming-Zhi (Evan) Jiang

Email: s112701018.mg12@nycu.edu.tw Homepage: evan-jiamg.github.io

## Education

**National Yang Ming Chiao Tung University (NYCU)** *Expected Jun 2027*
*Bachelor's Degree, Information Management and Finance (Information Management Track)* *Hsinchu, Taiwan*

## Publications

**Agent-based Modeling: Equilibrium, Echo Chambers, and Efficiency in Hybrid Coevolutionary Opinion Games** (Full Paper: arXiv:2609.27639; Conference Version: Google Drive; Accepted Proofs: Google Drive)
*Ming-Zhi Jiang, An-Tzu Teng, Jun-En Liu, Po-An Chen, Yung-Ming Li* *CSoNet 2026, Accepted*

## Undergraduate Research Project

**Hybrid Coevolutionary Opinion Games (H-COG)** Code & Data *Feb 2026 – Present*
→ **1st Place** · ORSTW Undergraduate Project Competition · AI and Big Data Analytics Division *Jun 2026*
→ **Co-author** · **Accepted** · Taiwan Summer Workshop on IM (TSWIM) 2026 Research Incubator *May 2026*
*Economics and Computing Lab, NYCU, Advisor: Prof. Po-An Chen*

- Proposed a hybrid framework that places classical Friedkin–Johnsen agents and LLM agents with language reasoning in the same dynamically rewired opinion-game network, filling two gaps: opinion games lack language reasoning, and LLM simulations do not measure social efficiency. Accepted at CSoNet 2026 as first author.
- Initialized agent stances from real Reddit data and ran 540 simulations. LLM agents reach consensus most easily, but at the highest overall social cost, about five times that of a classical FJ network; echo chambers form because of the dynamic rewiring rule, not the initial network structure.

## Research Experience

**Research Center for Information Technology Innovation, Academia Sinica** *Sep 2026 – Present*
*Part-time Research Assistant, CFDA Lab, Advisor: Prof. Chuan-Ju Wang* Progress Report *Taipei, Taiwan*

- Continuing the TREC 2026 User Simulation Track work from my summer internship, designed a two-stage Planner–Speaker user simulator: a Planner LM makes the core decisions, including when to end the conversation, and a Speaker LM writes the query. Trained the Planner with SFT and GRPO and submitted the final simulator to the TREC platform in October 2026.

**Summer Internship Program, Institute of Information Science, Academia Sinica** *Jul – Aug 2026*
*Research Intern, CFDA Lab, Advisor: Prof. Chuan-Ju Wang* *Taipei, Taiwan*

- Joined the TREC 2026 User Simulation Track, co-organized by NIST and international scholars including Krisztian Balog (Google DeepMind). TREC is a leading evaluation campaign in Information Retrieval, and this track develops user simulators that reproduce how real users converse in conversational search.

## Honors and Awards

**1st Place** · ORSTW Undergraduate Project Competition, AI and Big Data Analytics Division *Jun 2026*
**3rd Place** · 20th National Business Simulation Competition *Dec 2025*
**Academic Excellence Award** · National Yang Ming Chiao Tung University *Spring 2025*

## Leadership and Activities

Treasurer, SDC Software Development Club, NYCU *Aug 2025 – Aug 2026*
Venue Team Volunteer, SITCON (Students' Information Technology Conference) *Mar 2026*
International Volunteer in Nepal, VYA Vision Youth Action *Jan 2026*
